

Week #4 Week of September 28th	<p>Carolyn will be available Tues 2 - 3 and Thurs 2 - 4, I will come and go. I have an office hours Mon at 10 in my office.</p> <p>This is Enrollment Verification week and I have to verify you are in the class. If you have not passed in work or the email a week verifying you are in the class, then you need to contact me now to make sure you are not withdrawn from the class.</p> <p>Please listen to this video and read this handout about note taking.</p> <p><b>Note taking video</b></p> <p><b>Cornell method of note taking</b> is the specific one to read. I also suggest checking out the other links on this page.</p> <p>This is not assignment even though it says it is. We are going to do it in class. For online students you should definitely take the time to go over this because it deals with flowcharts and Access.</p> <p><b>Access SQL project (document version)</b> ← These are the problems we worked on in class.</p> <p><b>Books database with SQL version</b></p> <p><b>SQL code (document version)</b> This is a copy of the SQL code in case it gets messed up</p> <p>Check back!</p>
-----------------------------------	---

The database that shows the queries and the SQL code listed on the document and that is the reference we will use answer the questions in the project.

**Question #1:** Either find an SQL query that matches this logic and copy and paste the SQL into the answers or write the SQL that will accomplish this logic and paste it into this document. If you write, be sure to test!

Two conditions in an OR relationship.

FILE TOOLS VIEW SQL.doc (Protected View) - Word

PROTECTED VIEW Be careful—files from the Internet can contain viruses. Unless you need to edit, it's safer to stay in Protected View. Enable Editing

FirstSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And price<20;

#1

OR

The first one was two things in an OR relationship.

SecondSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And yearPub=2008 Or price<20;

ThirdSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 And price<50;

FourthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 Or topic="XHTML" And price<20;

FifthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 And topic="XHTML" And price<20;

SixthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book

WHERE topic="CSS" Or yearPub<2009 And topic="XHTML" Or price<20;

SeventhSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And (yearPub=2008 Or price<20);

EighthSQL  
 SELECT isbn, title, topic, yearPub, price, publisher  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 Or price<50 Or publisher="Course Technology";

End of document

We need to look at the problem and then either find a solution or write a solution.

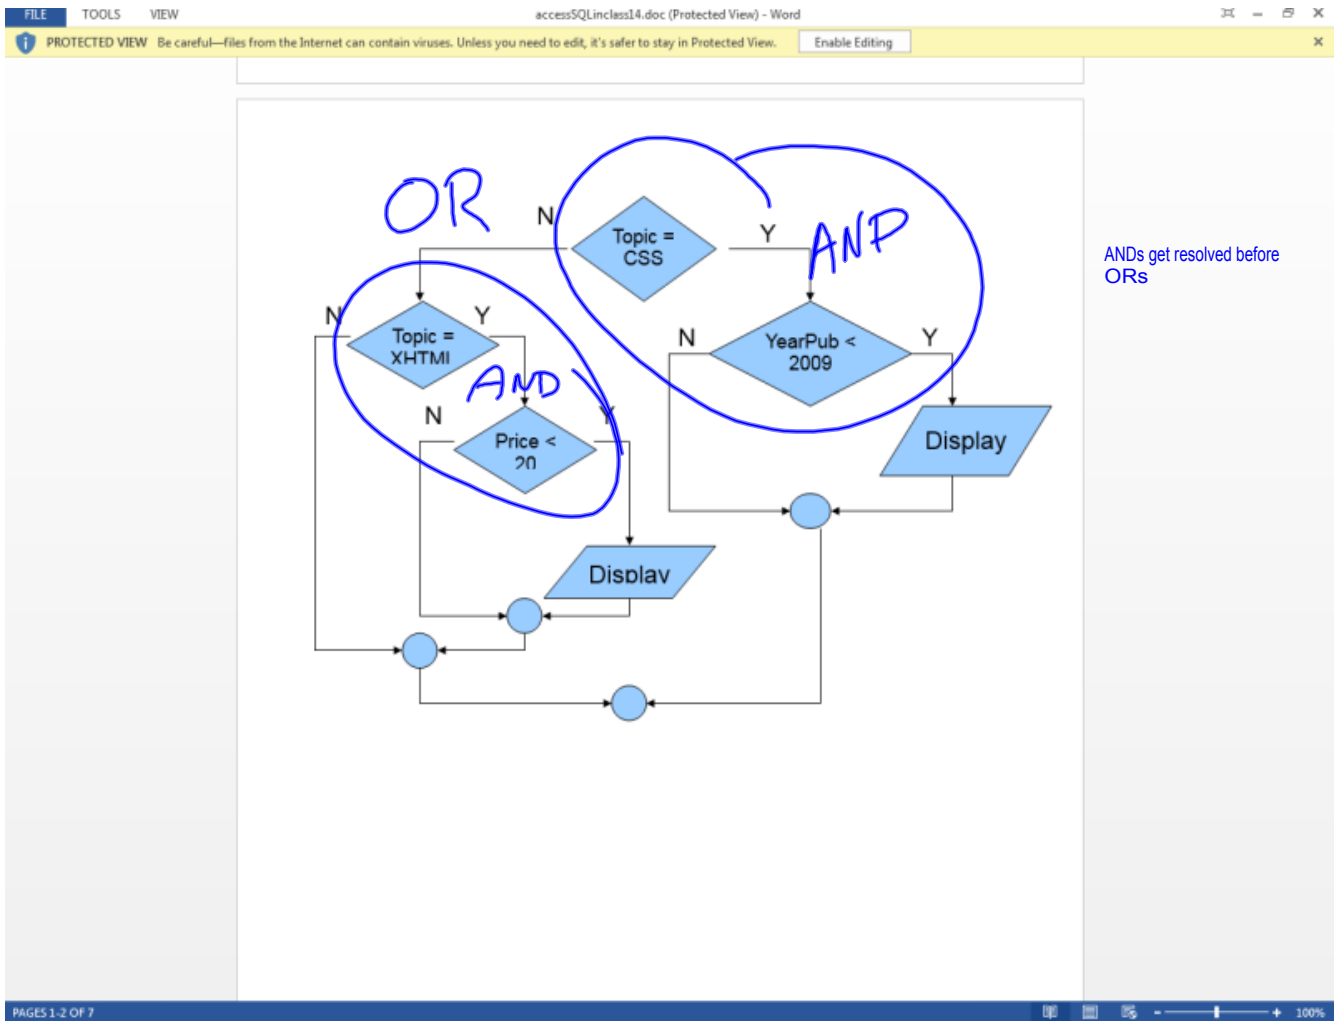

SCREENS 1-2 OF 2 140%

accessSQLinclass14.doc (Protected View) - Word

PROTECTED VIEW Be careful—files from the Internet can contain viruses. Unless you need to edit, it's safer to stay in Protected View. Enable Editing

The second problem. We need to find the SQL solution.

```
graph TD; Start(( )) --> D1{Topic = CSS}; D1 -- Y --> D2{YearPub < 2009}; D1 -- N --> J1(( )); D2 -- Y --> O1[/Display/]; D2 -- N --> J1; J1 --> D3{Topic = XHTML}; D3 -- Y --> D4{Price < 20}; D3 -- N --> J2(( )); D4 -- Y --> O2[/Displav/]; D4 -- N --> J2; J2 --> D3; D3 -- N --> J1; O1 --> J3(( )); O2 --> J3; J3 --> D3;
```

FirstSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And price<20;

SecondSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And yearPub=2008 Or price<20;

ThirdSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 And price<50;

FourthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 Or topic="XHTML" And price<20;

FifthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 And topic="XHTML" And price<20;

SixthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book

WHERE topic="CSS" Or yearPub<2009 And topic="XHTML" Or price<20;

SeventhSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And (yearPub=2008 Or price<20);

EighthSQL  
 SELECT isbn, title, topic, yearPub, price, publisher  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 Or price<50 Or publisher="Course Technology";

End of document

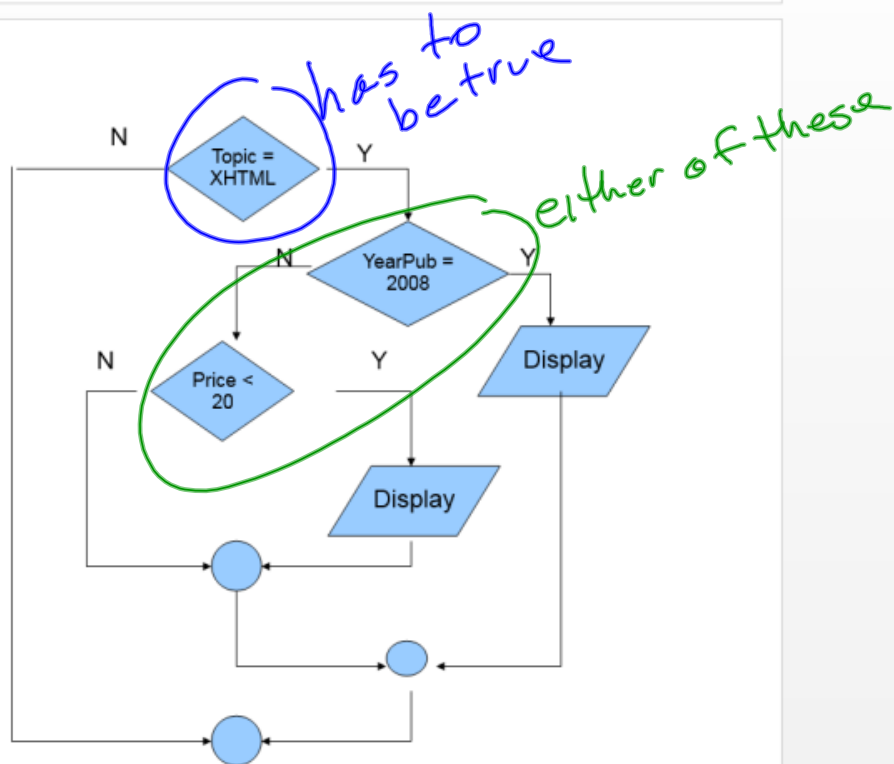

Solution to the second flowchart problem: ANDs are resolved before ORs.  
 The first two conditions are in an AND relationship and they are grouped. The third and fourth conditions are in an AND relationship and they are grouped. Third the OR checks to see if either group is true.

#2

3

Third problem

FirstSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And price<20;

#2 is not the answer because you have two conditions in an AND relationship and one that stands alone.

SecondSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And yearPub=2008 Or price<20;

just

①

ThirdSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 And price<50;

FourthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 Or topic="XHTML" And price<20;

FifthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 And topic="XHTML" And price<20;

SixthSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book

WHERE topic="CSS" Or yearPub<2009 And topic="XHTML" Or price<20;

SeventhSQL  
 SELECT isbn, title, topic, yearPub, price  
 FROM book  
 WHERE topic="XHTML" And (yearPub=2008 Or price<20);

The solution to the third problem.

② either ①

EighthSQL  
 SELECT isbn, title, topic, yearPub, price, publisher  
 FROM book  
 WHERE topic="CSS" And yearPub<2009 Or price<50 Or publisher="Course Technology";

AND resolved before OR  
 changes order resolved

Select \*

From book

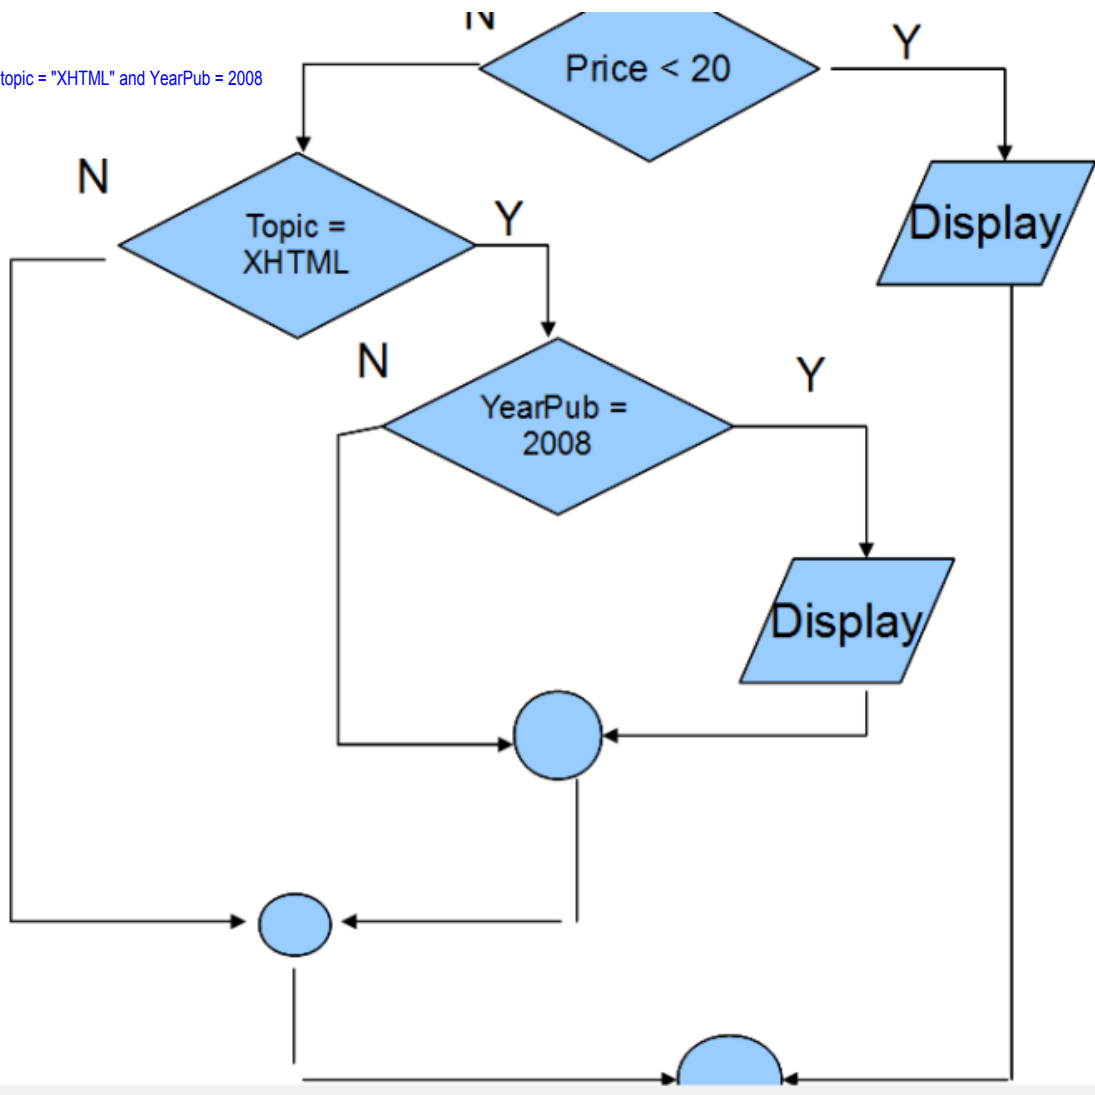

Where price < 20 OR

topic = "XHTML" OR

yrpub = 2008

Answer to #4 - three things in an OR relationship.

We want either  
price < 20  
OR  
the combination of topic = "XHTML" and YearPub = 2008  
it does not matter  
which of these you  
ask first

FirstSQL  
SELECT isbn, title, topic, yearPub, price  
FROM book  
WHERE topic="XHTML" And price<20;

SecondSQL  
SELECT isbn, title, topic, yearPub, price  
FROM book  
WHERE topic="XHTML" And yearPub=2008 Or price<20;

ThirdSQL  
SELECT isbn, title, topic, yearPub, price  
FROM book  
WHERE topic="CSS" And yearPub<2009 And price<50;

FourthSQL  
SELECT isbn, title, topic, yearPub, price  
FROM book  
WHERE topic="CSS" And yearPub<2009 Or topic="XHTML" And price<20;

FifthSQL  
SELECT isbn, title, topic, yearPub, price  
FROM book  
WHERE topic="CSS" And yearPub<2009 And topic="XHTML" And price<20;

SixthSQL  
SELECT isbn, title, topic, yearPub, price  
FROM book

WHERE topic="CSS" Or yearPub<2009 And topic="XHTML" Or price<20;

SeventhSQL  
SELECT isbn, title, topic, yearPub, price  
FROM book  
WHERE topic="XHTML" And (yearPub=2008 Or price<20);

EighthSQL  
SELECT isbn, title, topic, yearPub, price, publisher  
FROM book  
WHERE topic="CSS" And yearPub<2009 Or price<50 Or publisher="Course Technology";

*#5*  
*alone* *this group*

The flowchart asked the price < 20 question first.

If I asked the XHTML and 2008 questions first, then I need to ask the price < 20 if I get a no to either of the first two questions.

**Question #9:** Write the SQL query in Access to test for Course Technology as the publisher and either topic of CSS or price < 75. Test it and copy and paste the solution into the answer sheet.

**Question #10:** Write the SQL query in Access to test for Course Technology as the publisher and year published greater than 2005 or price < 25.

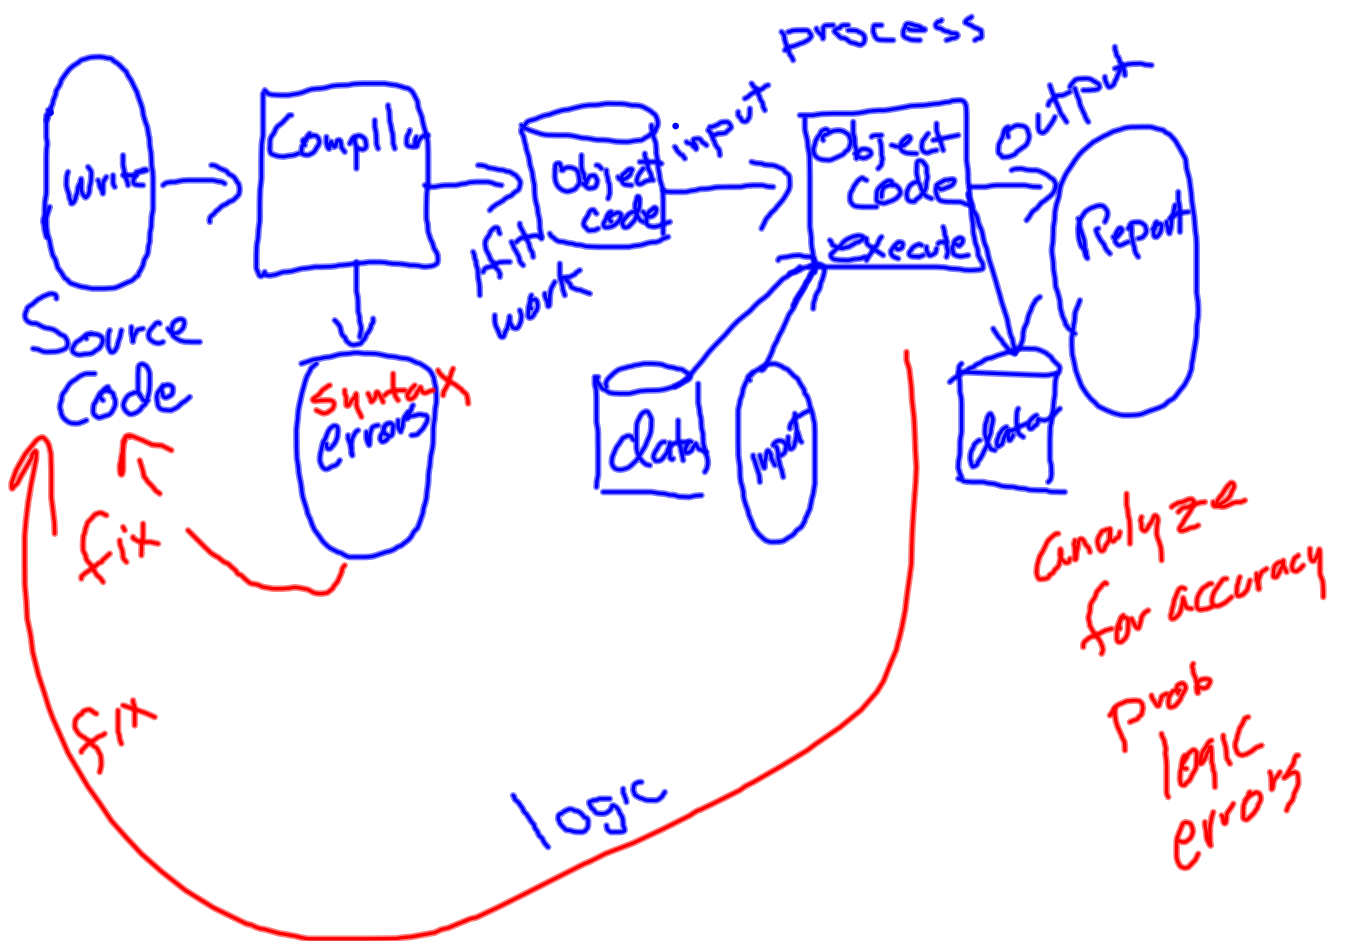

#9

WHERE pub = "CourseTechnology" and (topic =  
"CSS" OR price < 75)

#10

WHERE pub = "CourseTechnology" and (yearpub > 2005 OR price < 25)

We went through some of the key things in chapter #1 in the text.
