

Understand problem (what I need to do)

Plan logic 

```
graph LR; A[Plan logic] --> B[flowchart]; A --> C[pseudocode]
```

Code program (source code)

Compile into $\left\{ \begin{array}{l} \text{machine language} \\ \text{or} \\ \text{interpret} \end{array} \right. \left\{ \begin{array}{l} \text{Object code} \end{array} \right.$

Test program - logic

Put into production

Maintenance
