If you want advanced Visual Basic this fall, you can sign up for it under the CIS283 that I teach and tell me that you are going to really take advanced VB.
Creating a new web site and creating a new folder.
Added Default.aspx
Adding new folder I am naming App_Data. Then I add the database and don't forget to Refresh Folder.
This is my title

&lt;h1&gt; and the title
Adding the Toolbar for formatting.
Click to establish the database info.

Choose a Data Source Type

Where will the application get data from?

- Database
- Entity
- XML
- Object
- Site Map
- XML File

Select a data source type from the box above. Descriptive text for the selected data source will appear here.

Specify an ID for the data source.
